

Station Energy has developed an innovative concept for a solar- powered cold room that would provide refrigeration and freezing for fresh products of any type in isolated areas.

In a major step toward transforming its energy sector, the Government of Uganda has approved the development of a 100-megawatt (MW) solar photovoltaic power plant coupled with a 250 megawatt-hour (MWh) battery ...

Summary: Explore how the Kampala Energy Storage Industrial Project addresses Uganda's energy challenges through cutting-edge battery storage solutions. Learn about its applications in renewable integration, grid ...

On July 29, 2025, Vivo Energy Uganda and the Uganda National Oil Company (UNOC) signed an agreement to build a large Liquefied Petroleum Gas (LPG) storage and distribution hub at Kabalega Industrial Park in ...

Emerging markets are adopting commercial storage for peak shaving and energy cost reduction, with typical payback periods of 3-6 years. Modern industrial installations now feature integrated systems with 50kWh to ...

The project focuses on constructing LPG storage tanks, handling and cylinder filling equipment, and infrastructure aligned with the broader facilities at Kabalega Industrial Park a site under UNOC ...

Uganda has approved a major 100 MW solar project paired with a 250 MWh battery storage system--a landmark initiative for solar energy in Uganda. This ambitious project is designed to strengthen ...

The development of storage facilities, cylinder manufacturing, refilling stations, and expanded distribution networks will create numerous local jobs and strengthen national content, particularly in the oil ...

The Government of Uganda has issued a Gazetted Policy Direction authorising the development of a 100-megawatt-peak (MWp) solar PV plant with 250 megawatt-hours (MWh) of battery energy storage in ...

The Government of Uganda has officially issued a Gazetted Policy Direction authorizing the development of a 100 megawatt-peak (MWp) solar photovoltaic (PV) power plant integrated with 250 ...
