

With a 9MWh capacity per unit, it can charge approximately 150 electric vehicles or power a typical German household for six years, enhancing efficiency for large-scale applications. The ...

On the first day of the Smarter E show in Munich, CATL, the world's largest battery manufacturer, unveiled the Tener Stack, which it describes as the world's first 9 MWh ultra-large ...

On May 7th, 2025, CATL has unveiled the world's first mass-producible 9MWh ultra-large-capacity energy storage system solution, TENER Stack, setting a new industry benchmark with ...

Today, the company unveiled a 20-foot-tall energy storage system (ESS) called the TENER Stack, which, according to CATL, offers breakthroughs in storage capacity, deployment ...

On the first day of the Smarter E show in Munich, CATL, the world's largest battery manufacturer, unveiled the Tener Stack, which it describes as the world's first 9 MWh...

Compared to conventional 20-foot container systems, it achieves a 45% improvement in volume utilisation and a 50% increase in projected energy density. Its internal capacity reaches ...

Its stand-alone energy storage capacity is up to 9MWh, capable of charging approximately 150 domestic electric vehicles or powering an average German household for six ...

“To meet the expectation of a BESS system that has high energy density, small footprint, simpler AC-side configuration, and flexible deployment, we bring the latest CATL TENER energy ...

On May 7, CATL unveiled TENER Stack, the world's first mass-produced 9MWh ultra-large-capacity energy storage system solution, at the Battery Energy Storage Exhibition in Munich, ...
