

Summary: Vietnam is rapidly emerging as a hub for advanced energy storage solutions. This article explores the growing demand for high-efficiency energy storage equipment in renewable energy ...

Vietnam's energy storage race is like a game of Tetris: fast-paced, occasionally chaotic, but wildly rewarding if you slot the pieces right. With projects like GoodWe's Haiphong plant and VinES's ...

The BESS market is still in its early stages but it has been growing rapidly, mainly in developed countries. Key factors behind this growth are the fall in battery prices, improved stability of ...

May 2023: Japan's Marubeni Corporation partners with Vietnamese battery and energy-as-a-service provider VinES to build energy storage facilities in the Southeast Asian country.

This study aims to evaluate the economic performance of a solar power plant (SPP) in Vietnam both before and after integrating a BESS through key metrics including the levelized cost of ...

This article explores market trends, key applications, and how innovative solutions like EK SOLAR's storage systems address Vietnam's energy challenges while supporting sustainable development goals.

Vietnam 's Ministry of Industry and Trade is proposing a set of financial mechanisms to support the deployment of residential solar and storage installations designed for self-consumption.

Vietnam can leverage domestic solar manufacturing to meet domestic demand, implement direct power purchase agreements (DPPAs) enabling private renewable supplies, ...

Centralized photovoltaic (PV) projects paired with energy storage systems (like battery energy storage, or BESS) are at the heart of this transformation, driven by ambitious policies and...

The Vietnamese government has approved two new solar power plants and two battery energy storage systems (BESS) in the Nam Dinh and Thai Binh provinces. These projects are set to ...
