The file size does not reflect the real database size. In fact, after deleting entries from a table, the file is not shrunk; instead, it contains unallocated space that the engine will reuse by the next occasion.

Although you cannot use different sized slides in one PowerPoint file, for the actual presentation you can link several different files together to create a presentation that has different ...

WSL Solar's 6 volt solar panel 3W, built with the latest PERC monocrystalline solar cell (>21% efficiency). solar panel size: 120x160x4.5mm. Tempered glass laminated, durable & robust.

In several C++ examples I see a use of the type `size_t` where I would have used a simple `int`. What's the difference, and why `size_t` should be better?

I found two ways to determine how many elements are in a variable... I always get the same values for `len()` and `size()`. Is there a difference? Could `size()` have come with an imported ...
