

Wind-resistant Folding Containers for Aquaculture

Typically measuring 20 or 40 feet long, these containers are retrofitted with tanks, pumps, filtration systems, and environmental controls to create a self-contained aquaculture environment. ...

Built to remain buoyant on open water surfaces, these containers are widely used in marine and freshwater environments such as oceans, seas, and lakes for farming fish, shellfish, and seaweeds.

From water-resistant bins to corrosion-proof carts, our solutions help streamline workflow, protect stock, and maintain operational hygiene in demanding marine environments.

Performance parameters of the square cage: 1) Wind disaster resistance: Maximum level 8 2) Wave resistance: Maximum height of 3 meters in water 3) Flow resistance: Maximum flow rate is 1.0 m/s

Our collapsible folding frame tanks are easy to set up and deploy for aquaculture and fish farming--and they can be custom built to fit your requirements or water storage applications.

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by ...

In this page find a variety of different plastic vertical tanks, open top tanks, cone bottom tanks & stands, insulated bins, net weights and more. A variety of different applications are possible with our ...

Versatile Applications: The pool is ideal for aquaculture, such as fish or shrimp farming, and can also be used for temporary water storage in agricultural or emergency situations.

Collapsible, folding frame tanks are rugged, dependable water storage solutions. Our folding frame tanks can be easily shipped and store flat when not in use, and they can also be quickly set up and moved ...

Strongly Resistant to Storm: Our cages offer an impressive wind resistance, capable of withstanding typhoons up to 12 grade. They also withstand waves up to 7m high and current velocities of 1.2m/s.
