

Cannon Afros, a company of Cannon Group and market leader in high-performance dosing and mixing equipment, has developed an innovative direct infusion system for faster processing of epoxy and ...

Looking for tailored wind blade production lines? Contact us today to discuss your specific needs and discover how our custom solutions can enhance your production process.

We are one of the first-line suppliers in the environmental protection dust removal industry, providing a series of high-quality and reliable fog cannon products.

Enter the heavy wind cannon prototype developed by Vortex Energy Solutions in 2023. Unlike their spinning ancestors, these installations resemble industrial-grade air compressors turned inside out.

Born from the exigencies facing the wind energy market, this innovative and fully automatic system for in-line vacuum degassing of resins offers consistently high outputs and significantly reduced ...

In-line degassing system for wind turbine blade casting: efficient epoxy resin degassing with high output, low environmental impact, and compact footprint.

Fog cannon sprayer can be used for urban demolition, mining areas, thermal power plants, port terminals, urban air pollution, excessive dust area, metallurgy, chemical, coal, steel, construction, ...

Cannon's direct infusion process provides an innovative solution for wind turbine blades. Power generated by wind turbines accounts for just over 24% of the world's renewable energy generation ...

Item received in perfect condition ! SP Lightning Heavy Duty A26 Wind Cannon.

Several major wind turbine manufacturers have already indicated their interest in our innovative system in response to their need for a significant increase in the volumes of chemicals ...
